WORK EXPERIENCE

Super Mentor Technologies

03/2024 – 06/2024

SDE Intern

- Developed a fully responsive and secure user interface using Next.js with server-side rendering.
- Enhanced search efficiency by implementing vector search and Jmespath libraries with Redis.
- Transformed the backend architecture from monolithic to microservices for improved scalability and performance.

EDUCATION

JSS Academy of Technical Education, Bengaluru

12/2020 – 06/2024

- *Bachelor of Engineering (B.E.) in Computer Science* 8.4 CGPA
- **Relevant Coursework:** Programming Fundamentals, Operating System, Data Structures and Applications, Design and Analysis of Algorithms, Object Oriented Concepts, Discrete Mathematics, Computer Networks, Automata Theory, System Software and Compiler Design, Computer Organization, Machine Learning Concepts, Web Technology and Applications, Big Data Analytics, Internet of Things

ACADEMIC PROJECTS

Emowell – Depression Detection Chatbot using Machine Learning (10/2023 – 05/2024)

- Seamlessly melded React.js, Next.js, and Tailwind CSS to forge an immersive chatbot website.
- Engineered a secure Django backend with PostgreSQL, featuring Knox authentication for seamless login/signup, reducing login time by 50%.
- Enhanced user well-being with advanced mental health assessments like PHQ-9 and BDI-2, bolstered by ensemble learning using voting classifier algorithm, resulting in a 25% increase in users taking steps towards managing their mental health.

Influencer Dashboard (07/2023 - 08/2023)

- Created a React.js and Spring Boot app to unify social media profiles into one dashboard with individual and combined statistics.
- Implemented real-time data retrieval via web sockets and graphical data visualization.
- Secured data with JWT authentication, server-side rendering, and SHA-256 encryption.

Hospital Management System (12/2022 - 02/2023)

- Successfully partnered with a team member to create a user-friendly hospital management website using Flask, HTML, and CSS.
- Effectively managed a MySQL database housing extensive data for 20 doctors and over 450 patients, implementing various complex queries to facilitate seamless information retrieval.

SKILLS

Languages: Java, JavaScript (with jQuery), Python, Typescript, C, HTML

Frameworks: React.js, Next.js, Django, Flask, Node.js, Tailwind CSS, Spring Boot, Angular

Databases: SQL, PostgreSQL, MongoDB

Others: Git, Linux/Unix, Redis, RESTful APIs, Nginx, CI/CD pipelines

Soft Skills: Leadership, Communication, Team work

CERTIFICATIONS

- Associate Cloud Engineer - Google Cloud
- Operating System Fundamentals - edX
- SQL (Intermediate) - Hackerrank
- DevOps Beginners to Advanced - Udemy
- React.js Developer - Hackerrank

ACHIEVEMENTS

- Lead a team of 4 to publish a research paper about “Machine Learning Algorithms used to predict mental health” in International Conference on Multidisciplinary Research and Innovation (ICMRI 2024).
- Stood among top 3 teams out of 25 participating teams from 7 colleges in Inter-college hackathon.
- Qualified level 2 of flipkart Grid 5.5 in collaboration with 2 other team members.
- Raised 12 issues in Hacktoberfest 2023 and contributed 4 times.
