WORK EXPERIENCE

Super Mentor Technologies

12/2023 – 06/2024

SDE Intern

- Created a fully responsive, secure user interface using React.js along with server-side rendering using Spring framework.
- Deployed and maintained various web applications using Gitlab and FluxCD.
- Converted backend from monolithic to microservices, improving scalability and reducing downtime by 40%.
- Re-engineered the PostgreSQL database schema, optimizing data storage and improving overall system efficiency.

EDUCATION

JSS Academy of Technical Education, Bengaluru

12/2020 – 06/2024

- Bachelor of Engineering (B.E.) in Computer Science* 8.4 CGPA
- Relevant Coursework:** Programming Fundamentals, Operating System, Data Structures and Applications, Design and Analysis of Algorithms, Object Oriented Concepts, Discrete Mathematics, Computer Networks, Automata Theory, System Software and Compiler Design, Computer Organization, Machine Learning Concepts, Web Technology and Applications, Big Data Analytics, Internet of Things

ACADEMIC PROJECTS

Code Automation Bot (10/2024 - Present)

- Developing an intelligent bot using Django and Next.js that generates code in multiple programming languages based on user prompts, creating language-specific file structures.
- Integrated components and libraries as specified by users, enabling seamless setup for projects using various front-end and back-end frameworks like React, Django, and Node.js.
- Implemented support for a wide range of frameworks and technologies, reducing development setup time by over 70%.

Emowell – Depression Detection Chatbot using Machine Learning (10/2023 – 05/2024)

- Crafted a visually appealing user interface with Tailwind CSS, improving accessibility and user experience metrics, which led to a 35% increase in user retention over a three-month period.
- Engineered a secure Django backend with PostgreSQL, featuring Knox authentication for seamless login/signup, reducing login time by 50%.
- Enhanced user well-being with advanced mental health assessments like PHQ-9 and BDI-2, bolstered by ensemble learning using voting classifier algorithm, resulting in an accuracy of 94.6%.

Influencer Dashboard (07/2023 - 09/2023)

- Built a unified social media dashboard with React.js, Spring Boot, and MongoDB, providing a 360-degree view of statistics collected via various social media platforms like YouTube and Instagram.
- Implemented real-time data retrieval via web sockets and graphical data visualization using chart.js.
- Secured data with JWT authentication, server-side rendering, and SHA-256 encryption.

SKILLS

Languages: Java, JavaScript (with jQuery), Python, Typescript, C, HTML

Frameworks: React.js, Next.js, Vue.js, Django, Flask, Node.js, Tailwind CSS, Spring Boot, Angular

Databases: MySQL, PostgreSQL, MongoDB

Others: Git, Linux/Unix, Redis, RESTful APIs, Nginx, CI/CD pipelines, Docker, Gitlab, Flux

Soft Skills: Leadership, Communication, Team work

CERTIFICATIONS

- Google Cloud: Associate Cloud Engineer
- edX: Operating System Fundamentals
- IBM: SPSS V3 Modeler
- Udemy: DevOps Beginner to Advanced
- Hackerrank: React.js Developer

ACHIEVEMENTS

- Lead a team of 4 to publish a research paper about “Machine Learning Algorithms used to predict mental health” in International Conference on Multidisciplinary Research and Innovation (ICMRI 2024).
- Stood among top 3 teams out of 25 participating teams from 7 colleges in Inter-college hackathon.
- Qualified level 2 of flipkart Grid 5.5 in collaboration with 2 other team members.
- Raised 12 issues in Hacktoberfest 2023 and contributed 4 times.
